

A Dangerous Situation Arising: Part 3

Introduction

It was not my intention to produce a third part to this article but something stirred me to produce the following. This part 3 is wholly concerned with the Large Hadron Collider (LHC), situated on the Swiss-Franco border. Part 2 explained how we are living in a time of intense demonic presence through which HaSatan is directing humanity along the path he has prepared. I believe demonic presence will grow exponentially the closer we get to the end of this age and if further evidence is required of the stranglehold HaSatan has over this world, we need venture no further than eastern Europe and examine what is happening at CERN.

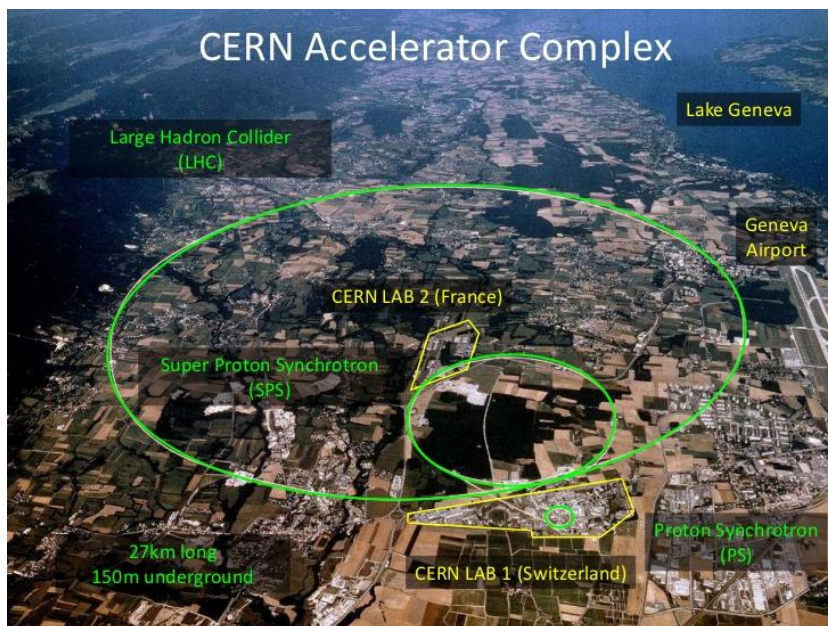

But what is CERN? CERN is an acronym derived from the French term *Conseil européen pour la recherche nucléaire* commonly referred to as The European Organization for Nuclear Research. CERN was established in 1954; the organization is based in a northwest suburb of Geneva on the Franco–Swiss border and has 22 member states. It is a European research organization that operates the largest particle physics laboratory in the world. The laboratory is commonly referred to as the European laboratory for Particle Physics (*Laboratoire européen pour la physique des particules*), which better describes the research being performed there. (Wikipedia).

The convention establishing the organisation was signed in Paris in 1953 by the 12 founding member countries: Belgium, Denmark, France, the Federal Republic of Germany, Greece, Italy, the Netherlands, Norway, Sweden, Switzerland, the United Kingdom and Yugoslavia.

The Collider Complex

It is the world's biggest machine, straddling the French-Swiss border and cost \$9 billion. The CERN collider is a tunnel complex having a 27 kilometer circuit 170 metres underground. Essentially it is a large ring of superconducting magnets with a number of accelerating structures to boost the energy of the particles along the way, causing them to smash into one another at astonishingly high speeds. It is the ultimate result of these collisions that physicists want to observe.

Physicists involved in the project say the laboratory was built underground because the Earth's crust provides protection against radiation. They also say it was buried out of respect for the natural landscape, which sounds slightly ironic considering the massive damage the collider could possibly cause down the road.

The size of the components is of titanic proportions and the complexity is unbelievable, I would ask you now to refer to Appendix A and ask, is a normal human brain really capable of producing construction so monstrous and intricate or is there something more sinister responsible? Part 2 of this study described the extent of demonic presence in the world today, could these demonic forces be behind this installation? Under the section 'Evidence of Demonic Influence Associated with CERN' this article will remove any conjecture and give credence to this supposition.

The Issue

We said in part 2 how it is abnormal for any species of life to willingly act in a manner resulting in its own extermination. With its 'one step further' policy CERN is entering into dangerous and uncharted waters. Speaking to a British tabloid, Sergio Bertolucci the former Director for Research and Scientific Computing at the facility said,

"The super collider could open otherworldly doors to another dimension for a very tiny lapse of time, mere fractions of a second. However, that may be just enough time to peer into this open door, either by getting something out of it or sending something into it. Of course," added Bertolucci, "after this tiny moment the door would again shut; bringing us back to our 'normal' four-dimensional world ... It would be a major leap in our vision of nature... And of course [there would be] no risk to the stability of our world."

Of course a director of CERN is never going to say anything other than how safe everything is. On the other hand some very knowledgeable physicists, not the least being Professor Stephen Hawking, disagree with Bertolucci and have voiced strong concerns. Professor Hawking was of the opinion that the direction in which CERN is heading could not only result in the extermination of all life forms but the destruction of the whole of the universe. He was specifically referring to the announcement by CERN on 4 July 2012, that they had found the Higgs Boson particle, commonly referred to as the 'god particle' because of the role physicists believe it played in the 'big bang' theory of creation.

The God particle found by CERN could destroy the universe, Hawking wrote in the preface to a book, *Starmus*, a collection of lectures by scientists. The Higgs Boson could become unstable at very high energy levels and have the potential to trigger a "catastrophic vacuum decay 'a black hole' which would cause space and time to collapse and... we would not have any warning to the dangers," he continued.

What Professor Hawking is saying is that the 'God Particle' scientists believe created the world could actually end it, too. However, Hawking was skeptical that the experiments at CERN could lead to the apocalypse. He estimated that a particle accelerator necessary to achieve the 100bn GeV (whatever that is) would be larger than Earth and would not "be funded in the present economic climate. We will see how those in control at CERN are in fact designing a much larger collider than the one they currently have.

Professor Hawking is not the only voice in the scientific wilderness predicting possible catastrophe if CERN continues in the atomic fast lane. Astrophysicist Neil de Grasse Tyson told Eugene Mirman on his Star Talk radio program, that the experiment could literally cause the planet to explode. To quote Tyson, *"Ask yourself: How much energy is keeping it together? Then you put more than that amount of energy into the object."* Tyson was confident of the result: *"It will explode."*

In late 2008, when CERN was first firing up the engines on its atom-smashing machine, Otto Rossler, a German professor at the University of Tübingen, filed a lawsuit against CERN with the European Court of Human Rights, on the grounds that the facility could trigger a mini black hole that could get out of control and annihilate the planet. The Court tossed out Rossler's request and whilst it did generate some heated discussion, there has not been a forum for full democratic debate and there is no institution having authority to set limits and safeguards with respect to the possible dark side of CERN's experiments. It is astounding that a facility having such cataclysmic potential, essentially governs itself and is beyond external interference.

Evidence of Demonic Influence Associated with CERN

There are four indications pointing to an evil influence associated with the collider complex;

- Its geographic location
- The chosen mascot
- Its logo
- The acronym CERN itself

CERN's curious choice of geographic location

CERN is partially situated in the French town "Saint-Genus-Poilly." The name Pouilly comes from the Latin "Appolliacum." In Roman times there existed in this place a temple in honour of the Greek god Apollyion (the god of Destruction). The people who lived there believed the town to be a gateway to the underworld. The very location of this installation is not only an ancient site of pagan worship but the deity worshipped is that of the destroyer. The Scriptures contain a reference to this same entity,

"To him was given the key of the bottomless pit. And he opened the bottomless pit... And they had a king over them, which is the angel of the bottomless pit, whose name in the Hebrew tongue is Abaddon, but in the Greek tongue his name is Apollyon." (Rev.9:1-2, 11).

This brings us straight to the choice for the mascot.

CERN's Choice of Mascot

Outside its headquarters building sits an ancient statue of Shiva, ancient Apollyon. Shiva is the Hindu god/goddess of destruction and is the third god in the Hindu triumvirate. The triumvirate consists of three gods who are responsible for the creation, upkeep and destruction of the world. The other two gods are Brahma and Vishnu. Brahma is the creator of the universe while Vishnu is the preserver of it. Shiva's role is to destroy the universe in order to re-create it. Was it not HaSatan's desire of equal status to that of YHWH that caused his fall?

In the Hindu religion, this form of the dancing Lord Shiva is known as the Nataraj and symbolises Shakti, or life force. As a plaque alongside the statue explains, the belief is that Lord Shiva danced the Universe into existence, motivates it, and will eventually extinguish it. Carl Sagan drew the metaphor between the cosmic dance of the Nataraj and the modern study of the 'cosmic dance' of subatomic particles.

The statue is on permanent display in the square between buildings 39 and 40, a short distance from the Main Building

CERN Logo

For further evidence that demonic influence is associated with this facility we need only look at CERN's logo.

If we unwind the logo we discover it incorporates the number of the beast 666.

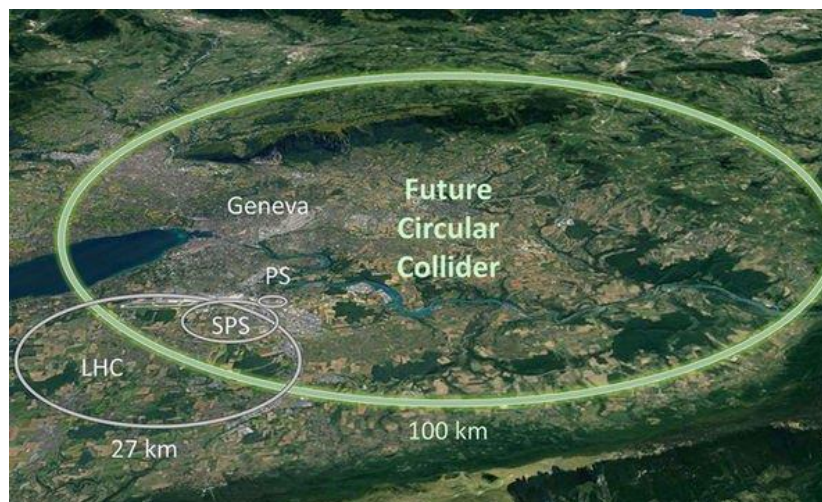

The acronym CERN itself

Some have pointed out how "CERN" is the first four letters of the name of the horned pagan god named Cernunnos. In the Wicca religion Cernunnos was the god of the underworld, a horned god who is the lord of death. They believe he is the "comforter and consoler" after death and before reincarnation and that he rules the underworld where the souls of the dead reside as they await rebirth. Is it just a coincidence that CERN has to go deep underground to do their 'god' harnessing experiments?

When HaSatan is in control deception rules with the truth cloaked in falsehood and CERN is no exception. In 1989, under the guidance of Tim Berners-Lee, CERN began the World Wide Web project, which led to the first webpage in history. On April 30, 1993, CERN announced that the World Wide Web would be free to anyone. HaSatan knows such announcements placate public opinion, negates objection, and avoids scrutiny enabling him to continue towards his ultimate goal – the destruction of YHWH's creation. CERN could be the ultimate weapon in HaSatan's armoury, particularly if allowed to proceed with its aspirations for the future.

The Future Aspirations of CERN – The FCC

In total disregard of the concerns voiced by leading Physicists, CERN is recklessly progressing a much larger collider dubbed the 'Future Circular Collider' (FCC) in an attempt to answer the legion of questions that still remain about the universe. The photo below shows how the FCC dwarfs the current LHC,

The FCC would have a circumference of 100 kilometers four times that of the existing LHC and have 10 times the atom-smashing power. CERN released its conceptual design and report in January 2019. Researchers hope to

have the accelerator online by 2050 at a cost of more than \$22 billion. Construction would involve digging a new tunnel under CERN and then installing the hardware, including behemoth magnets that would allow particles to collide with one another.

According to CERN, the FCC's main task will be to plumb the depths of the universe by smashing atoms into one another at unimaginable speeds — far faster than the current LHC. Scientists will then study those collisions to see what new particles may emerge. Let us for a moment consider the capabilities of the existing collider;

Massive gravitational pull

The current collider is composed of some 9,600 super magnets – which are 100,000 times more powerful than the gravitational pull of Earth - that fire protons around a circular track at mindboggling speeds. A beam might rotate for up to 10 hours, travelling a distance of more than 10 billion kilometers, enough to make it to the far reaches of our Solar System and back again. Travelling just below light-speed, a proton in the LHC will make 11,245 circuits every second.

No less amazing are the magnet's coils, which are made up of 36 twisted 15mm strands, each strand comprised in turn of 6000-9000 single filaments, each filament possessing a diameter as small as 7 micrometers. The 27km length of the LHC demands some 7,600 km (4,100 miles) of cable, which amounts to about 270,000 km (145,000 miles) of strand — more than enough to circle the Earth six times at the Equator. According to the CERN website, if the filaments were unravelled, they would *“stretch to the Sun and back five times with enough left over for a few trips to the Moon.”*

Extreme temperatures

There may be another reason for the CERN super collider being buried hundreds of feet underground: The unbelievable hot temperatures it can reach. How hot you ask? Well, about as hot as conditions in the Universe after the Big Bang, or more than 100,000-times the temperature at the centre of the Sun. This will be achieved, CERN says, by accelerating and colliding together two beams of heavy ions.

Considering the FCC will have 10 times the smashing capacity of the LHC what will be its gravitational pull and temperatures? What or who is behind the minds of men wanting a machine having 10 times the destructive capacity of the machine they already own and alleged by experts to be capable of destroying our universe? Could it be a satanic force that is motivating these desires?

Strange Cloud Formations over CERN

An alleged reoccurring phenomenon is the abnormal cloud formations above the CERN location, some of which are illustrated in Appendix B. Is it just coincidence, are the pictures a hoax or is there something more sinister to this? I'll leave it for you to decide.

Conclusion

CERN is an ominous threat not just to our planet but to our universe and possibly beyond, not even the physicists working at CERN know the destruction their experiments may cause: they are working blindfold. Where danger lurks normal minds hesitate, we are programmed to avoid danger so what mind is driving CERN?

Now the Spirit speaks expressly, that in the latter times some shall depart from the faith, giving heed to seducing spirits, and doctrines of devils; (1Tim.4:1)

Is CERN under the control of the doctrine of devils? Above we saw a definite presence of unrighteous influences at CERN and when you join with demonic forces there can be only one controlling entity- the demons. But Scripture tells us that it is YHWH who will bring an end to this evil humanity, it is YHWH who will end this age not HaSatan, so is there any need to be concerned with CERN? Yes there is when we consider the words of Mashiach in Matt.24:22, *“And if those days were not shortened, no flesh would be saved, but for the sake of the chosen ones those days shall be shortened.”* Whatever form the tribulation takes it will have the potential to end all life on earth, thus CERN may well play a part and to be forewarned is to be forearmed. If we are aware of HaSatan's activities we are less likely to be deceived.

Parts 2 and 3 of this study, demonstrate how HaSatan's devils are controlling the minds of the top academics of society, whatever their field of expertise; politics, religion, science, physics, biology etc. But you only have to read Scripture to realise just how endemic is HaSatan's demonic control today,

'And do not make any cuttings in your flesh for the dead, nor put tattoo marks on you. I am YHWH. (Lev.19:28).

Not only is it almost impossible to find a body without a tattoo or piercing, rebellion has become the fashion of the day and the body treated with no more respect than an artist's canvas. This is the result when devils are allowed dominion over a person's heart: so strong is this dominion within some individuals their tattoos are of satanic design and message. Let us consider more from the Scriptures,

But whoring and all uncleanness, or greed of gain, let it not even be named among you, as is proper among set-apart ones – Neither filthiness (obscenity), nor foolish talking, nor coarse jesting, which are not fitting, but rather thanksgiving. (Eph.5:3-4).

But now, also put off all these: displeasure, wrath, evil, blasphemy, filthy talk from your mouth. (Col.3:8).

Foul language is no longer considered unacceptable, quite the contrary, today coarse language is considered the norm. If ever Torah keepers felt separate/set apart, it is today.

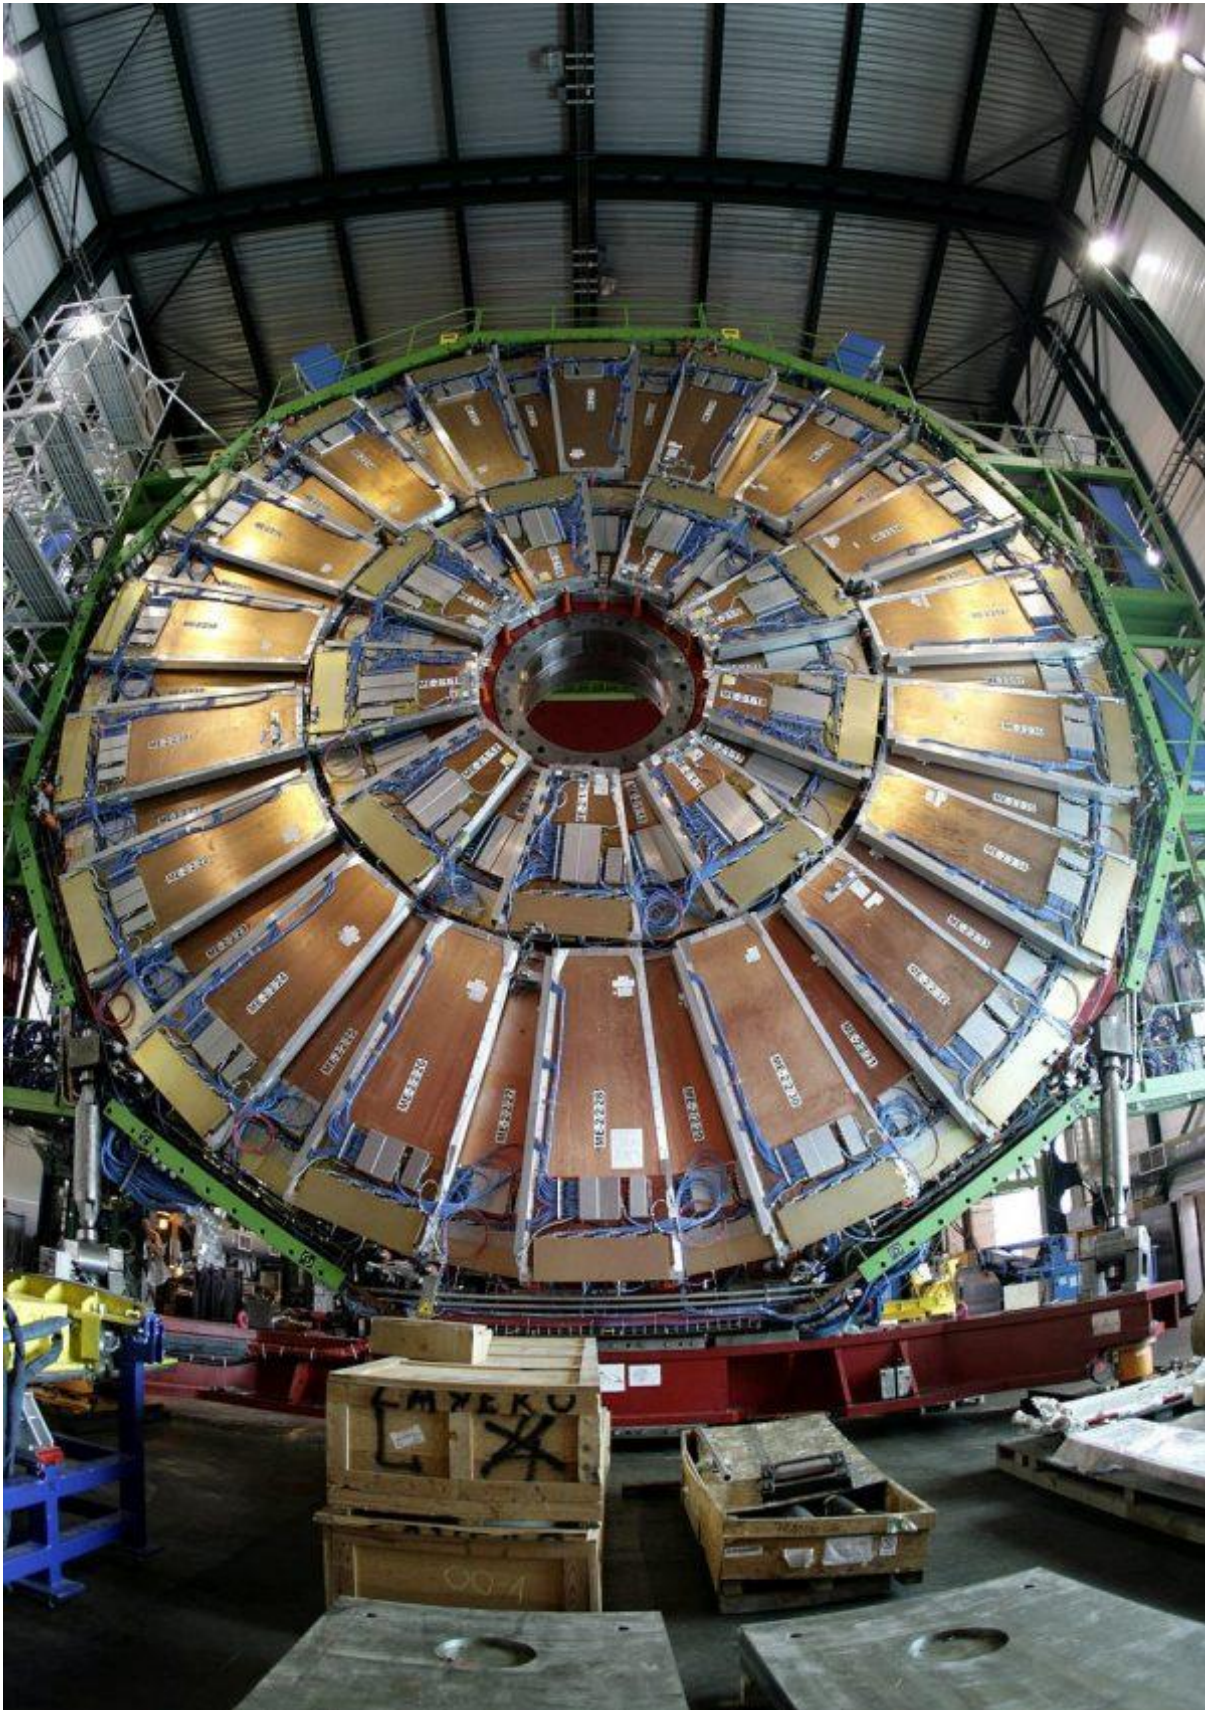

But in actuality HaSatan's effect on this planet is not limited to humanity he is gradually choking earth's life generating ability;

- Because the land has not been allowed its Shabbat rests as decreed, it is exhausted and can no longer perform without chemical stimulants. To all intents and purposes the land is dead in many areas.
- The earth's seas are fighting for survival on two fronts; pollution and over fishing and losing to both. It is closely approaching when the seas will be in the same condition as the land – dead.

When we consider the state of this planet today Mashiach's phrase 'all flesh' in Matt.24:22 can be understood to encompass all forms of life not just human but animal, mineral and vegetable.

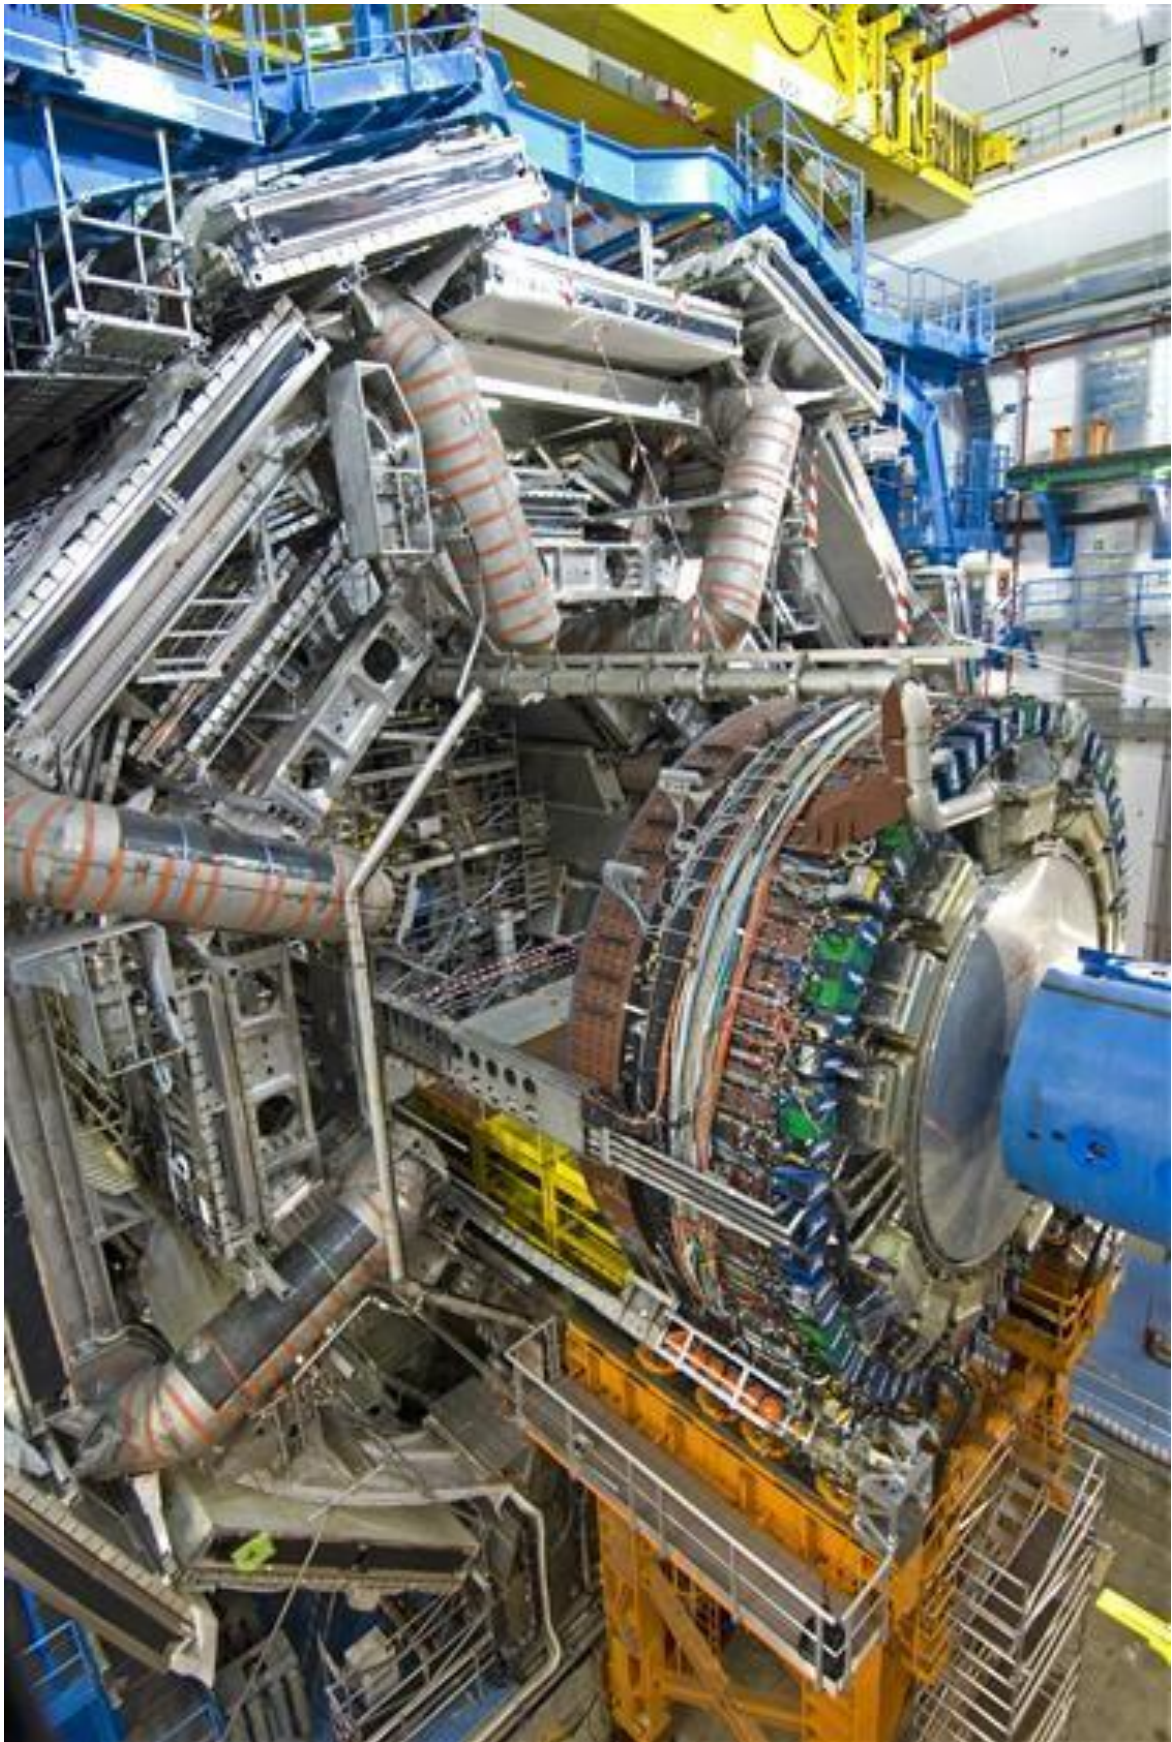

Evil will continue to progress and this could well be an open-ended study but that is not the intention. The purpose of this trilogy is to alert people to the extent and the nature of the evil. As we get ever closer to the end of this age, evil will continue to evolve in unexpected places and we must be prepared. What we are experiencing is all part of the 'falling away' described in 2 Thessalonians chapter 2 and by recognising the situation for what it truly is we are less likely to become victims of it. Only if we know our enemy, recognise where he is and what he is about will we not be caught off guard.

PPENDIX A

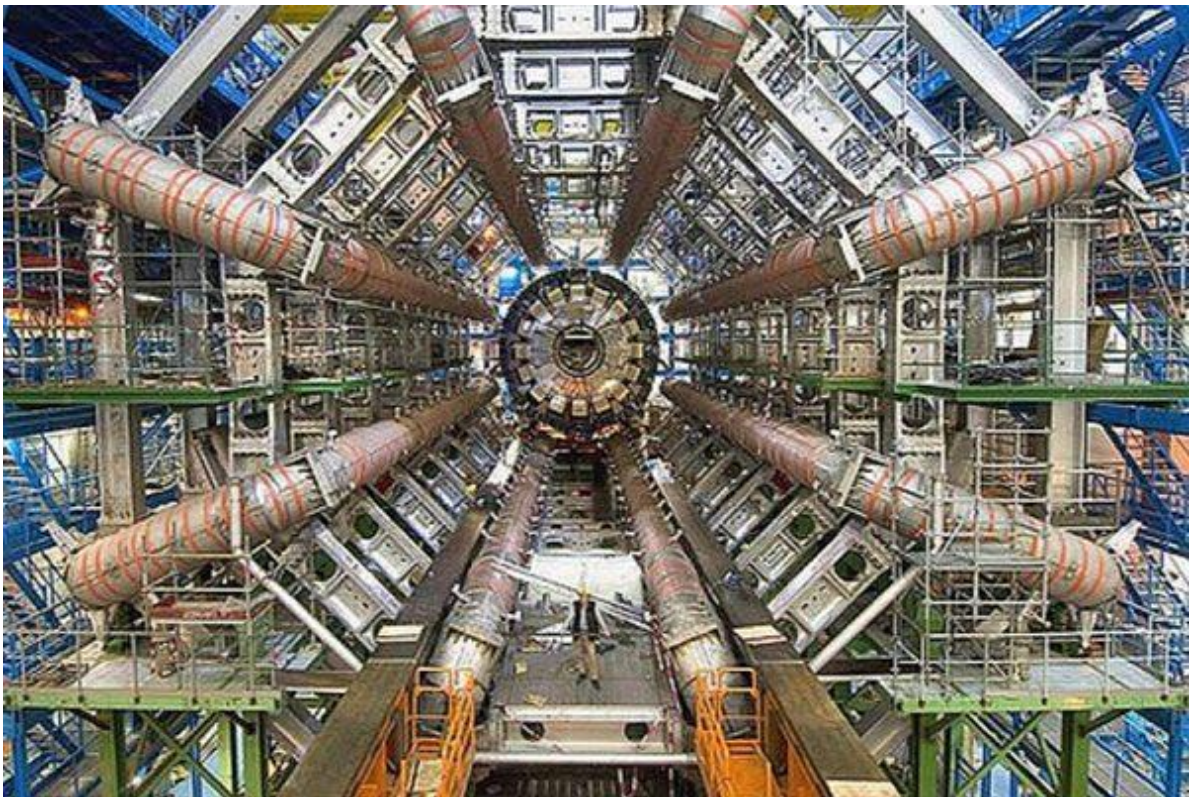

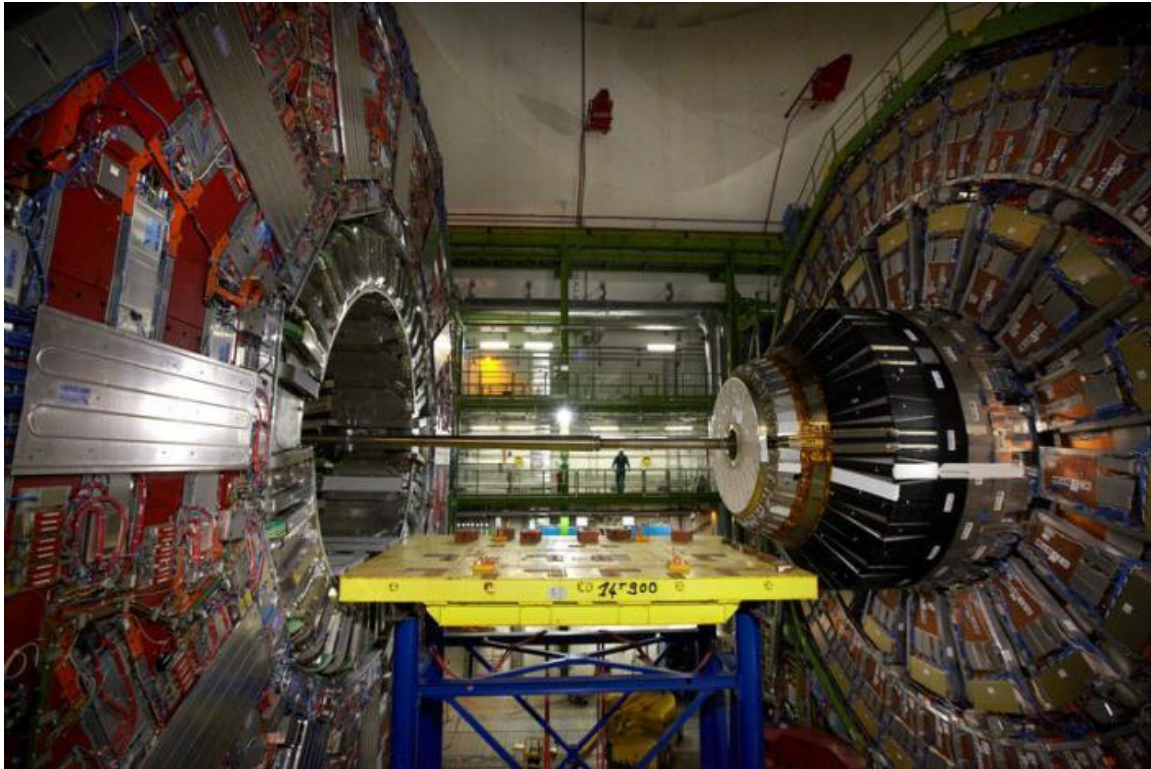

APPENDIX A

Notice the access platform (gantry) at the bottom of the photo. This shows the how huge this component is.

APPENDIX A

These two photos have a an operator pictured in the centre which gives an indication of the size of the equipment

APPENDIX B

The above is a radar picture

There is a video that can be watched showing these clouds swirling and In December 2015 - Geneva, Switzerland, US tourists filmed a UFO/strange orb entering the centre of the radial cloud formation after which the clouds appear to evaporate. You can watch the video on YouTube "CERN UFO filmed entering 'swirling portal' over Large Hadron Collider." Is it fact or a hoax? Whilst it is difficult to separate fact from fiction today, what is certain is something is affecting the upper atmosphere, the extremes in today's weather prove it. Could it be the result of demonic activity on the earth?
